

# Finally, Dog Steps Designed for Dogs

Now available are the exciting new **Good Steps®** brand dog steps. These unique, patent pending dog steps are designed just for canines and allow you to **adjust the settings 100's of ways** in order to achieve the safest and most comfortable configuration for your dog at every step of life.

## Why Your Next Dog Steps Should Be *Good Steps*

### *Customizable and Adjustable to fit Your Dog's Special Needs*

Dogs come in literally dozens and dozens of different sizes, shapes, physical abilities, differing agilities, health conditions and other needs. Yet the typical pet stairs, or "pet steps", offer a one-size-fits-all approach to handle all those different types of dogs. Doesn't make sense, does it?

Now, imagine, a set of dog stairs which can adjust with your dog from puppy hood through their senior years and help them reach a variety of special spots from their favorite spot on the couch to that dog heaven, the bed... comfortably and safely....through all the twists that life may throw at them. Neat, huh?... Well, that is just what the dog loving folks at Good Steps have created.

## Adjusts to Any Dog

### *Over 100 Settings Adjust from Puppies to Seniors and Pocket Dogs to Poodles*

Now available are the exciting new **Good Steps** brand dog steps. These unique, patent pending dog steps are designed just for canines and allow you to **adjust the settings 100's of ways** to achieve the safest and most comfortable configuration for your dog at every step of life.

One could say **Good Steps** are for dog owners everywhere, and they are... but, really, **Good Steps** are clearly designed for the benefit of dogs, plain and simple.

Which dogs can benefit from these new dog stairs? According to the claims and the videos on the GoodSteps.dog website, just about every dog can make use of these. Although the real benefits seem most enjoyed by small to medium size dogs, one person used the Good Steps for their elderly 75 lb. Lab with great success.
